📁 Projects

A.R Hourie, *Lebanese construction company website* 🔗

Handling frontend development aspects using Next.js and css . Fetching and displaying data from Strapi to create a dynamic and engaging user interface.

Chance App, *React native app* 🔗

As the React Native developer for an entertainment app, I crafted an engaging frontend experience. Unity games intergration, video ads, coin collection, and manage subscriptions, item transactions and much more.

HR App, *React Native app*

- Designed and developed a platform for recruiters to post jobs and freelancers to apply, enabling efficient hiring workflows.
- Integrated QR code-based job event system for work time tracking, where freelancers generate a QR code and recruiters scan it to start the work timer.
- Streamlined applicant management with job creation, application tracking, and acceptance workflows.
